DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 and 2, drawn to a method for improving liver generation.

Group II, claim(s) 3-9, drawn to a method of treating or preventing pathological processes related to fibrotic processes.

Group III, claims 10-16, drawn to of treating or preventing toxin induced pathological processes.

Group IV, claims 17 and 18, drawn to a method of treating hepatic cirrhosis.

Group V, claims 19 and 20, drawn to a method of improving liver regeneration.

Group VI, claims 21-24, drawn to a method of improving the capacity of a cirrhotic liver to regenerate following a partial hepatectomy.

Group VII, claims 25 and 26, drawn to a method for increasing the amount of biologically active IGF-1.

The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: compositions of the formula of claim 1 are not novel. For example, halofuginone is known (see US Patent

Art Unit: 1614

4485115, column 8, lines 25-26). Therefore a holding of lack of unity of invention against Groups I-VII is proper.

Inventorship Notice

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
